

General Purpose Cleaner

Green Products Floor/Carpet Care System

Tile & Grout Restorer

Green Product's Tile & Grout Restorer cleans better, easier, faster and safer. This unique formula combines Neutralizer and Cleaner/Conditioner, to achieve superior cleaning of grout, the third dimensional surface. High concentration, easy to use.

Green Product's Tile and Grout Restorer does not leave a film or residue after cleaning.

Green Neutral Cleaner

Highly concentrated, neutral-pH, hard-surface cleaner will not dull or harm high-gloss floor finish.

- No added fragrance - natural citrus fragrance
- Thoroughly cleans floors and hard surfaces while leaving no harmful residue
- Use in autoscrubbers or with a mop and bucket for floors
- For surfaces other than floors, apply with a sponge, cloth, spray bottle, brush, low-pressure sprayer, pressure washer, etc.

Green Cleaner/Degreaser

Powerful emulsifying agents quickly dissolve soil and grease on plastic vinyl, Formica, fiberglass, finished wood, metal concrete, porcelain, ceramic and quarry tile and more.

- Contains no harsh caustics, ammonia or solvents
- Safe for all water washable surfaces
- Use with a sponge, cloth, spray bottle, brush, low-pressure sprayer, pressure washer or autoscrubber

Green Glass & Surface Cleaner

Fast-working formula dissolves soils quickly.

- Economical, streak-free and film-free cleaner for glass and other hard surfaces
- Cleans and shines glass, Plexiglass, chrome, stainless steel, plastic, vinyl, tile, porcelain and more
- Contains no ammonia
- No added fragrance - natural citrus fragrance
- Dilutes at 3-6 ounces per gallon depending on soil load

THE SAFETY FACTOR

We're living in a world where there is far reaching concern for the protection of our environment. All of our products are safer for the environment, they are safer for the people who work with them and the surfaces to which they are applied.

Green Product Floor Care System

Green Product Carpet Care System

Stripper

Resilient and hard floor wax/finish stripper. Green Product's Stripper is extremely heavy duty, simple and safe to use.

Green Product Stripper uses implosion technology that allows more complete floor finish removal, allowing the floor to be stripped better, faster, easier and safer.

Stripper contains no harsh caustics, ammonia or solvents. Green Product's Stripper contains a low odor formula and a micro-foam catalyst that creates a lubricant to protect floors from harsh floor pads.

Step 1

Neutralizer

Neutralizes and conditions stripped floors properly before the applications of floor sealer and/or finish to ensure that proper bonding takes place. If used in combination with Cleaner/Conditioner, Green Product's Neutralizer becomes an extraordinary concrete and grout cleaner.

Step 2

Cleaner/Conditioner

Green Product's Cleaner/Conditioner conditions surfaces to help repel soils, keeping surfaces cleaner longer. Cleaner/Conditioner restores appearance and maintains gloss when used in conjunction with the floor care system.

Green Product's Cleaner/Conditioner conditions surfaces by adding moisture back into the film keeping floor flexible and adding durability. Cleaner/Conditioner is completely biodegradable and does not leave a film or residue after cleaning.

Step 4

Floor Finish

Non Metal Floor Finish

Resilient and hard floor "wet look finish". Green Product's Floor Finish is an ultra high speed, self sealing crystal clear and UV resistant finish of the highest quality.

Due to the greater gloss restoration capabilities, finish repels impregnation of foreign particles and black heel marks. Green Product's Floor Finish dries and cures from the bottom up within 15 minutes, resulting in increase time between stripping and recoating. Clarity and leveling ability allows for traffic lane touch up and blending. It is not necessary to recoat entire floor.

Coverage up to 5000 sq. ft./gal. for recoats and 2500 to 3000 sq. ft./gal. after stripping for initial set-up for first 2 or 3 coats.

Green Product's Floor Finish can be used on all types of resilient floors, natural stone, ceramic tile, wood, concrete, rubber, VAT and VCT. Product contains no styrene.

Step 3

Lifter

Green Product's Lifter is a three-in-one multi-purpose, upholstery and drapery cleaner. Lifter cleans deeply into all types of fibers and fabrics, unlike conventional cleaners that remove only surface soils.

By restoring the substrate to its like new state, the time required between cleanings increases.

Green Product's Lifter is extremely effective on a wide variety of fibers and fabrics including new generation carpet. Lifter does not leave residuals therefore fresh water rinsing is not necessary.

Green Product's Lifter can be used as a pre-spray and pad cleaning as well as a general purpose spotter. Lifter can also be used for the removal of chewing gum from most carpet fibers.

Step 1

Neutralizer

When Green Product's Neutralizer is used in conjunction with the carpet system, it is used to remove residuals left from conventional carpet cleaning chemicals. Neutralizer also acts as an anti-browning agent. Green Product's Neutralizer is highly concentrated, insure dilution rate as per directions.

Step 2

Color Rejuvenator

Color Rejuvenator is an extraction liquid for carpet, upholstery and drapery cleaning that revives color without attracting residue. Formulated for professional extraction and maintenance of all carpet and fabrics. Color Rejuvenator cleans deeply into all types of fabrics, unlike conventional cleaners that remove only surface soils. By restoring the substrate to its like new state, the time requirements between cleanings increases.

Green Product's Color Rejuvenator is extremely effective on a wide variety of fibers and fabrics including new generation carpet. Color Rejuvenator can be used in both truck mount and portable extracting equipment.

Step 3

Liquid Odor Counteractant

Liquid Odor Counteractant is a carpet, upholstery and general-purpose odor counteractant available in a variety of signature fragrances.

Liquid Odor Counteractant is used in a wide variety of applications to eliminate pet odors, cigarette smoke, smoke from fires, sewage waste, mildew, stale and musty odors.

Liquid Odor Counteractant can be added to Lifter when cleaning carpets to freshen fibers. It may also be sprayed as directed onto the carpet. Liquid Odor Counteractant must not be added to anionic cleaners.

Step 4

Protectant

Green Product's Protectant is a ready-to-use carpet and upholstery protector. It is simple to use with no special equipment needed. Creates a soil and stain resistant protective shield around the fibers.

Protectant extends the life of all types of fabrics and fibers; it also illuminates the beauty of the fibers at a higher level, for a longer period of time.

Applications of Protectant do not need special spraying equipment. Protectant can be applied using a coarse fan tip and electrical sprayer at 50psi or fine tip and conventional sprayer. Green Product Protectant does not stiffen the fabric or change the color.

Step 5
